County Engineer

Rod Creager, P.E., P.S.
Chief Deputy Engineer

April 7, 2021

CLARIFICATION

Reconstruction of County Road H
Between State Route 109 and Road 8-1

RE: PG Binder and Underdrains

1. PG Binder

Item 1 under the 441 and 442 asphalt concrete note on Page 65 of the proposal states: All asphalt shall be designed for medium traffic volumes and shall use a PG 64-22 asphalt binder, unless otherwise specified.

The binder for reference number 48 and 49 is specified in 442.04 of the ODOT CMS as PG 70-22M for surface courses and PG 64-28 for intermediate courses. The asphalt binders listed in the ODOT CMS are to be used for these line items.

2. Underdrains

The underdrains are located under or in the area of cement stabilized subgrade. The subgrade is to be stabilized prior to the underdrains being placed. A portion of the stabilized subgrade will be removed when the underdrain is placed. Please bid accordingly.

There is a note on page 68 and 69 of the proposal titled Value Engineering Change to the Proposal – Construction Costs and Time. Acceptance of any change to the plans is at the sole discretion of the Engineer.

End of clarification.
