The road sections to be treated are to be swept of any loose chip seal aggregate, as per ODOT item 409.08. The sweeping of the Fog Seal sections shall be done approximately 10 to 14 days after the chip seal application. Care should be taken as to not dislodge the imbedded seal coat aggregate. The sweeping of the required sections shall be included in the cost of the Seal Coat.

Care should be taken to insure the applied fog seal materials have cured sufficiently before traffic is allowed to drive on it. Maintenance of Traffic for all applications shall be covered under Item 614.

#### **ITEM 614 - MAINTAINING TRAFFIC**

1. Local traffic only shall be maintained for access to and from local home sites.
2. Lights, signs, barricades and drums shall be provided by the **CONTRACTOR** and placed in accordance with the latest edition of the Ohio Manual of Uniform Traffic Control Devices. Maintaining Traffic in accordance with the above provisions shall be included for payment in the lump sum for Item 614, Maintaining Traffic.
3. The **CONTRACTOR** is responsible for contacting and keeping informed, the Fulton County Sheriff and all affected school districts during the entire project.
4. The **CONTRACTOR** shall notify the **ENGINEER** in writing seven working days prior to the closing of any Roads.

#### **TESTING FOR QUALITY CONTROL**

An independent testing laboratory may be retained to insure quality control on the entire project. Should any retesting be required to settle disputes, such testing will be at the **CONTRACTOR's** expense.

#### **UNDERGROUND UTILITIES**

Prior to any construction activity, the **CONTRACTOR** shall contact the Ohio Utility Protection Service (OUPS) at 1-800-362-2764.

#### **CONTROL POINTS**

Before actual construction operations begin, the **ENGINEER** will reference all existing monuments, railroad spikes, iron bolts, etc. in the survey line. Upon completion of the pavement surfacing, the **ENGINEER** will reestablish all control points in the new pavement.

#### **PROTECTION AND RESTORATION OF PROPERTY AND LANDSCAPE**

The **CONTRACTOR** shall be responsible for the preservation of all public and private property, and shall protect carefully from disturbance or damage all land monuments and property markers until the **ENGINEER** has witnessed or otherwise referenced their location and shall not move them until directed.

#### **LOAD RESTRICTIONS**

The **CONTRACTOR** shall comply with all legal load restrictions in the hauling of materials on public roads beyond the limits of the work. The operation of equipment of such weight as to cause damage to structures or to any other type of construction will not be permitted. Hauling of materials over the base course or surface course under construction shall be limited as directed by the **ENGINEER**. The **CONTRACTOR** shall be responsible for all damage done by his hauling equipment and shall correct such damage at his own expense.

## **SUBMITTALS**

Within 45 days from the date of the Notice to Proceed, the **CONTRACTOR** shall submit, to the **ENGINEER**, all required submittals, including but not limited to: material supplier(s), material specifications, shop drawing(s), sub-contractor(s) list, and project progress schedule. The **CONTRACTOR** will not be eligible for a contract time extension due to his failure to submit the required submittals in a timely manner. As a courtesy, the **ENGINEER** may provide each **CONTRACTOR** a list of required submittals for reference. The completeness of this list, however, is not guaranteed and it shall be the responsibility of the **CONTRACTOR** to verify its completeness.

The **CONTRACTOR** shall, in writing, inform the **ENGINEER** of all submittals that deviate from the requirements of the Contract Documents. Submittals that are part of a system shall be made as a fully integrated submittal that will enable the **ENGINEER** to verify compliance with the Contract Documents.

The submittal(s) shall clearly identify the project name and shall be complete with respect to dimensions, materials of construction, the name and address of the manufacturer and local supplier, and pertinent catalog numbers. The information shall include enough detail to permit the **ENGINEER** to verify compliance with the Contract Documents and the design intent. The **CONTRACTOR** shall submit enough copies of all submittals to allow the **ENGINEER** to retain up to two (2) copies of each submittal.

The **CONTRACTOR**'s stamp of certification and signature shall be required on all copies of every submittal made to the **ENGINEER**. The stamp of certification shall constitute a representation to the **ENGINEER** that the **CONTRACTOR** has determined and verified all quantities, dimensions, field construction criteria, materials, catalog numbers, and similar data, or assumes full responsibility of doing so, and that the **CONTRACTOR** has reviewed and coordinated each shop drawing and sample with the requirements of the Contract Documents.

The **ENGINEER** will review and act with reasonable promptness upon shop drawings and samples, but this review and action shall be only for the conformance with the design concept of the project and for compliance with the information given in the Contract Documents, and shall not extend to means, methods, sequences, techniques or procedures of construction, or to safety precautions or programs incident to such factors. The review of and action upon a separate item will not indicate acceptance of the assembly in which the item functions.

The approval of the **CONTRACTOR**'s submittals is for general conformance to the Contract Documents, but subject to the detailed requirements of the Contract Documents. Such review by the **ENGINEER** shall not relieve the **CONTRACTOR** of his responsibility for the accuracy, proper fit, functioning or performance of any phase of the work included in the Contract Documents. If the **ENGINEER** rejects a submittal as non-compliant with the Contract Documents, or if insufficient information has been provided to determine compliance, the **CONTRACTOR** shall make a re-submittal which complies with the Contract Documents or provides additional information as required. Re-submittals shall be clearly identified by the **CONTRACTOR** as such and all changes from the previous submittal shall be plainly evident through the use of conventional revision symbols, or an equally effective method.
