CLARIFICATION #1

Bridge 24A.9 Rehabilitation

RE: Surface Preparation of Existing Structural Steel

The following question has been submitted:

Question: The quantity for Ref 16 Surface Preparation should match the painting quantities of Ref 17 and Ref 18, please revise.

Answer: The Ref. 16, Item 514 – Surface Preparation of Existing Steel quantity of 2,880 SQ FT is the entire surface area of the existing 7 steel beams. The entire surface area of all existing beams shall be power washed. However, only the top flange and other isolated areas of the beams, as determined in the field, are to be further cleaned and prepped for priming and painting, which accounts for the difference in quantities. Please bid this item accordingly.

End of clarification.
