- ◆ **Basic pond management information.**
- ◆ **Fish stocking and hatchery information.**

REQUIREMENTS FOR A GOOD POND

- ◆ **A suitable site (the right soil base).**
- ◆ **Proper construction.**
- ◆ **Minimum of 8' deep and 1/4 acre in size for good fish production. Banks should have minimum 3:1 side slopes and very little shallow area to discourage aquatic vegetation growth.**
- ◆ **Large vegetated area surrounding pond to filter out silt and other pollutants from entering pond.**
- ◆ **All livestock fenced away from pond to protect banks.**
